FYI Sean, Davis, and Scott, surface water location 4 west is located at RM 7W offshore from Arkema. Also, I don't believe there is any language in the FSP about being within a 25- to 50-ft radius of the target location.

Best,
Kyle

Good Morning,

We are at surface water transect 4. Sample location on west side is not accessible due to shallow waters and pilings. Proposal is to get in as close as possible at approximately 6' feet of water but we'll be about 130' from sample target. Ken will call Davis. Please feel free to call my cell if you would like to discuss. (b) (6) Madi
